以印象派尊重自然光的态度，剖析整个案子。导入自然光，让室内外景色融为一体是设计师在处理此案的准则，因此景和光是此案最重要的元素。立面的设计就像把每一个立面当作画作式的处理。开窗的大小与比例，空间对象的比例分割都以此原则来发展。室内景与室外景的重叠与交错，增加了此案的层次与变化。

Holding an attitude of respecting the natural light as impressionism is the way to analyze this case. Leading-in the natural light to blend the indoor and outdoor scenes together is the principle of the designer against this case. Therefore, scenery and light are the two most important elements here. The design of vertical faces is just like treating each face as a painting. Size and proportion of the window cutting, partition of the space objects are both based on the principle. The duplication and interlacing of indoor and outdoor scenes increase the levels and changes of this case.
